

■ We have some exciting news!

We are thrilled to share that last September, the Masterlab team—comprised of *Dr. Marvin H. Weintraub, Efren León, Emiliano Rojo and José A. Pescador*—, had the opportunity to attend the Annual **SAE Brake Colloquium & Exhibition** in Grapevine, Texas. This event is a cornerstone for professionals in the brake industry, and our team was eager to engage with the latest innovations and insights.

During the colloquium, our members attended a variety of talks and exhibitions, gaining valuable knowledge that will enhance our capabilities and service offerings. In addition to the presentations, we had the pleasure of reconnecting with esteemed colleagues and suppliers. We also had the privilege of meeting with experts in the field, including *Roy and Adam Link, David Kidd, Saikiran Divakaruni, Bart Cann, Matteo Crippa, Ikegami Tokunosuke, Ketrl and Georg Ostermeyer, Romina Myrtaj and Seong Kwan Rhee*. These interactions fostered collaboration and shared experiences that are vital for our growth in the brake industry.

We look forward to applying what we learned and deepening our partnerships as we strive to lead in innovation and excellence. Thank you to everyone who made this event a success!
